### Profile

I build high-quality websites and admin dashboards using **Node.js, React, TypeScript, and MongoDB**. I have experience in **both frontend and backend development**, as well as **server deployment** with **Nginx, Cloudflare, and Ubuntu Server**. I have worked on projects like **AzeSert MMC, Raja Restaurants MMC, Interviewsland, Guven Finans, and Aqsa News LLC**, and collaborated with **Kodaze LLC** and **Pilgrim Education LLC**. My focus is on creating **fast, scalable, and user-friendly applications**.

### Professional Experience

#### Freelance

##### *Freelance Web Developer* ✉

As a Freelance Web Developer, I have worked on various projects, specializing in developing websites and admin dashboards using modern web technologies. Here are some of the key projects:

November 2023 –  
present  
Baku, Azerbaijan

- **Raja Restaurants LLC - [rajarestaurants.com](https://www.rajarestaurants.com)** ✉: Developed the website and admin dashboard using Node.js, MongoDB, React TypeScript, with deployment on Nginx and Cloudflare (5-month contract).
- **Interviewsland Startup - [interviews-land.info](https://www.interviews-land.info)** ✉: Developed the platform for an Azerbaijani startup using Node.js, React.js, and JavaScript with Nginx, Cloudflare, and Figma UI (4-month contract).
- **Guven Finans LLC - [guvenfinans.az](https://www.guvenfinans.az)** ✉: Led the redevelopment of the website using React.js, TypeScript, Tailwind CSS, and Node.js, with deployment on Nginx and Cloudflare.
- **Aqsa News LLC - [aqsanews.com](https://www.aqsanews.com)** ✉: Developed the website with a focus on API throttling for search functionality, using Node.js, React.js, MongoDB, and Figma UI.

## Pilgrim Education LLC

Frontend Developer 

June 2024 -  
November 2024

I worked on a full-stack web application project for Pilgrim MMC. The design process primarily used Figma, along with additional Figma plugins to enhance the workflow. For frontend development, I used React.js as the main framework, supported by Tailwind CSS for responsive styling and TypeScript for type safety. The backend utilized the MERN stack: MongoDB for flexible data storage, Node.js for server-side development, and Express.js for building APIs.

Project: pilgrimedu.az 

## AzeSERT HALAL LLC

Frontend Developer 

May 2024 -  
August 2024  
Baku, Azerbaijan

While working at AzeSert MMC, I was responsible for developing the company website and admin dashboard. I utilized Node.js and React TypeScript as the primary technologies for building the application, and deployed it using Nginx, Ubuntu Server, and Cloudflare.

Project: halalcert.az 

## Kodaze LLC

Frontend Developer 

November 2021 -  
May 2022

Worked on building custom solutions using Next.js, React.js, TypeScript, Tailwind CSS, and Figma. I helped set up the company CRM system to improve internal processes.

Layihə: kodaze.com 

## ITEM Academy

Frontend Developer(Intern)

January 2021 -  
September 2021  
Baku, Azerbaijan

Worked on internal systems using React.js, JavaScript, and CSS, learning from senior developers and contributing to system designs.

Project: umico-clone.app 

## Education
